Welcome to Our Office!

Dr. Crystal, Dr. Jim, Dr. Kristin

We appreciate the trust and confidence you have placed in us by selecting our office to serve your dental health needs. We recognize and emphasize the importance of gentle, caring doctors and team.

Our team is friendly, knowledgeable and ready to answer any question you may have regarding scheduling appointments, processing insurance, making financial arrangements and oral health.

Continuing education is an essential part of our practice so you can be confident you are receiving the most advanced treatment. Our goal is to develop a confident and trusting relationship with you throughout the years in order to make your dental care a pleasant experience.

Office Hours

Our office hours have been designed for your convenience. For the most effective and efficient use of your time and ours, we operate on an appointment basis. If you cannot keep a scheduled appointment, please give us at least a 24 hour notice so the time may be given to someone else.

Emergencies

If you have a problem you consider to be an emergency, we do too. Every effort will be made to see you the same day you call. Occasionally, emergencies require changes in our schedule. When this happens, every consideration will be given to our regularly scheduled patients.

Services

Total dental health is dependent on sound teeth and healthy supporting bone, the way teeth fit together (occlusion) has a great deal to do with the life expectancy of your teeth. We offer comprehensive dentistry including cosmetic, implants, periodontal and restorative services. We have CEREC 3D® ceramic crowns which are designed and completed in one appointment. Also available is the ZOOM2! teeth whitening system which has tremendous results for lightening and brightening your smile.

As a team, we want you to know that we are dedicated to providing gentle and quality dental care. We take the time to explain everything that needs to be done and want you to be completely comfortable with your treatment. Our goal is for you to have the healthiest smile possible and get results which we can both be proud of. An initial appointment for adults includes a complete new patient exam, a thorough diagnosis of the teeth and gum tissue, necessary x-rays to detect any decay and an oral vision camera to show our patients their teeth and areas of concern. At this appointment, the type of prophylaxis (cleaning) and the amount of time needed will be treatment planned for your next visit. Once established as a patient, all preventative maintenance visits will include a cleaning.

Our goal is to help you maintain healthy teeth and gums. We look forward to taking care of you!
